

- SSRA is actively recruiting for a **full-time partnership track** or **employed** radiologist to join our private practice based on the South Shore of Massachusetts in the greater Boston area.
- Openings for general diagnostic radiologists with expertise or fellowship-training
- (board-certified or eligible when appropriate) in Neuroradiology, Musculoskeletal, Nuclear Medicine or Body Imaging.
- Highly competitive salaries with the possibility of partnership.
- A hybrid work schedule composed of a mix of on-site and remote reading.
- On-site coverage at South Shore Hospital and outpatient imaging centers located within a few-minute drive of the hospital.

Requirements: MA license

Who we are: South Shore Radiological Associates (SSRA) is a well-established private practice group comprising 30+ radiologists. We provide imaging services for South Shore Health (SSH) and South Shore Hospital, the largest independent health system and largest community hospital in southeastern Massachusetts. We are a collegial, hard-working group that prides itself on caring for our patient population. Our group is comprised of fellowship-trained radiologists who read both subspecialty and general diagnostic imaging exams. In addition, we provide a full range of IR and breast imaging services staffed by fellowship-trained subspecialists.

South Shore Hospital, 10 miles south of Boston, is a 396-bed hospital, level 2 Trauma Center, with MICU, neonatal ICU, and a Primary Stroke Center. SSH has a large primary care group referral base from South Shore Medical Center, a large multispecialty medical practice, as well as strong clinical partner affiliations with Boston Children's Hospital, the Dana-Farber Cancer Institute, and Brigham and Women's Hospital. Large multispecialty surgical services include trauma, thoracic, breast, colorectal surgery, ENT, neurosurgery, orthopedics, and urology. These referral patterns result in a highly diverse and interesting case mixture.

South Shore Hospital is a show site for GE MRI and CT. Imaging equipment has been fully upgraded or replaced in the past 2 years and includes state-of-the-art multiple 1.5T/3.0T MRI scanners and our entire fleet of CT scanners (including dual energy). We recently upgraded to Visage for PACS, and use PowerScribe 360 (soon to upgrade to PS one) for voice dictation.

South Shore Hospital is located 10 miles south of Boston, a truly world-class multicultural city. Boston and its surroundings are a wonderful place to live, work, and raise a family. We have some of the best public and private schools in the country. Leisure and recreational destinations abound and include multiple beaches (Cape Cod is less than one hour away), hiking, biking, and skiing.
